S A S I

STRATEGIC ADVISORY SERVICES INTERNATIONAL, LLC

# Flash Memory Venture Funding

A solid first half of 2019 with \$178M in finding, led by Lightbits with an impressive \$50M 1<sup>st</sup> round of funding which included strategic investors, Cisco, Dell and Micron...

## Top Five Rounds

Tegile \$70M 4<sup>th</sup>  
 Crossbar \$35M 4<sup>th</sup>  
 Nantero \$31.5M 5<sup>th</sup>  
 Everspin Tech \$29M 2<sup>nd</sup>  
 Crocus \$21M 5<sup>th</sup>

Elastifile \$50M 2<sup>nd</sup>  
 Diablo Tech \$37M 3<sup>rd</sup>  
 Avalanche Tech 23M 6<sup>th</sup>  
 Nantero \$21 6<sup>th</sup>  
 E8 Storage \$12M 2<sup>nd</sup>

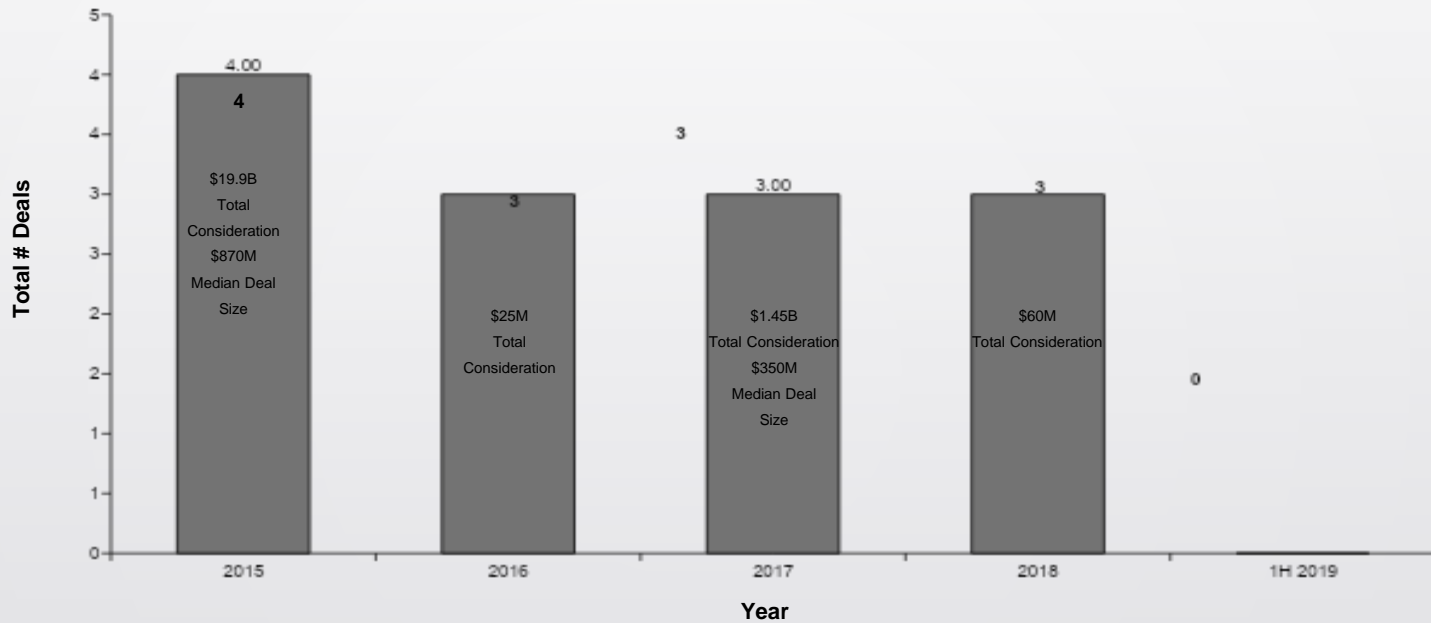

Kaminario \$75M 5<sup>th</sup>  
 Vexata \$54M 4<sup>th</sup>  
 CNEX Labs \$38M 3<sup>rd</sup>  
 Tegile \$33M 5<sup>th</sup>  
 Kalray \$26M Later

Spin Transfer \$52M 2<sup>nd</sup>  
 Crocus Tech \$35M 6<sup>th</sup>  
 Nantero \$30M 6<sup>th</sup>  
 ScaleFlux \$25M 2<sup>nd</sup>  
 CNEX \$23M 4<sup>th</sup>

Lightbits \$50M 1<sup>st</sup>  
 VAST Data \$40M 2<sup>nd</sup>  
 Avalanche \$33 7<sup>th</sup>  
 Pliops \$30 2<sup>nd</sup>  
 MemVerge \$25M 1<sup>st</sup>

# Flash Memory M&A

While venture funding remains strong, the M&A valve has been shut off...

## Top Deals

WD/SanDisk \$19B NetApp/SolidFire \$870M Silicon Motion/Shannon Sys \$58M	Nutanix/PernixData \$25M Pivot3/NexGen Stg Kingston/Imation	HPE/Nimble Storage \$1.1B WD/Tegile \$350M Soros/Violin \$15M	DDN/Tintri \$60M Violin/X-IO Storage Synopsys/Kilopass
---	---	---	--

However, its' already picking up in July/August with Storcentric acquisition of Vexata, Rambus acquisition of Northwest Logic and AWS purchase of E8 Storage

# Flash Memory Venture Market Map

We expect VC funding to remain strong in the 2<sup>nd</sup> half of 2019 and we could also see another 3+ M&A trades happening before year end...

Evaluator Group

# New(er) use cases for Flash

Camberley Bates, Managing Dir / Analyst

# Flash and Data Protection

What are your plans to utilize flash for data protection storage over the next 24 months?

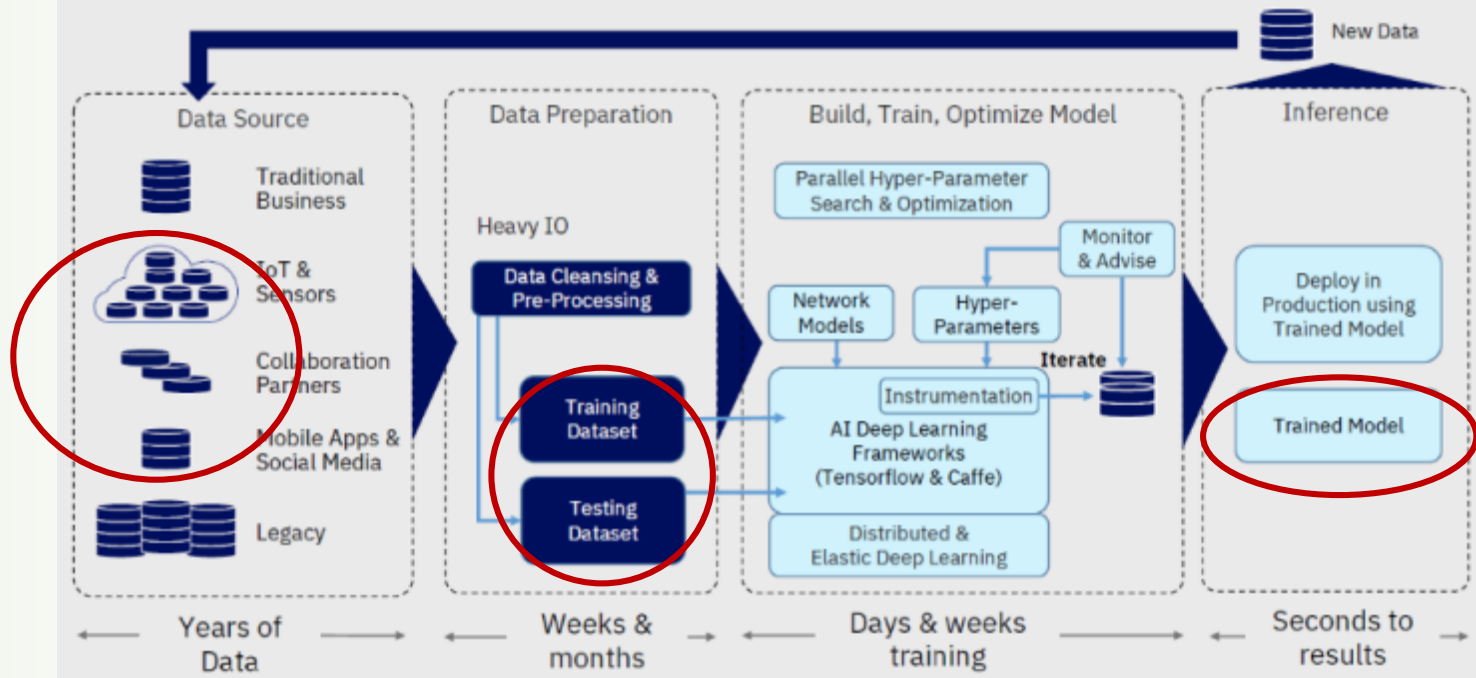

- “Using all –flash arrays... not that expensive for back up and DR”
- “We need performance (backup target) to finish faster”
- “Less Hardware maintenance”

# Flash and Analytics Flow

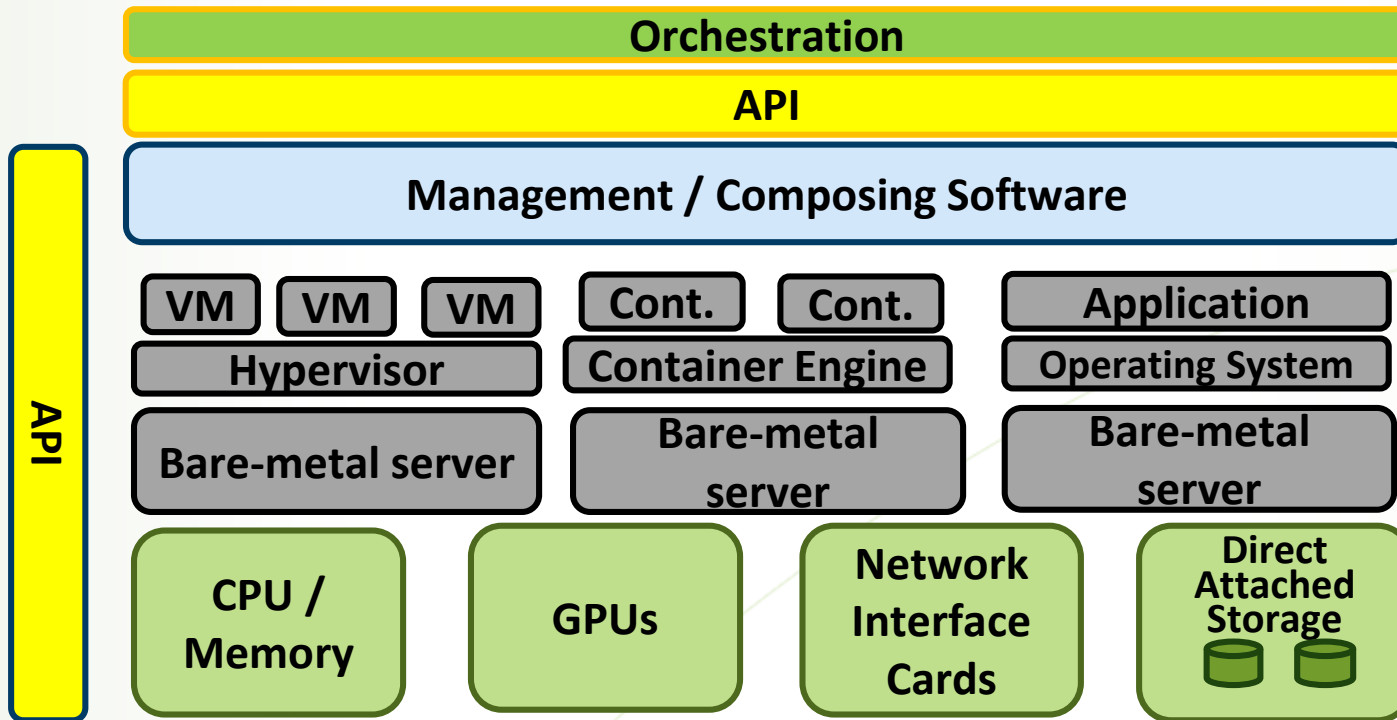

Work flow and data flow is complex

8/7/19

# Composable Infrastructure

# Next in the Data Center

---

- Second Generation AFA Storage
- Long- term archive
  - High density 50TB SSD
  - 10++ year life of drives – eliminates tape or HDD migration

[www.EvaluatorGroup.com](http://www.EvaluatorGroup.com)

**HURWITZ  
& ASSOCIATES**  
Insight to Action

# Cloud and Edge Will Drive Sustained Demand for Flash

Jean S. Bozman

Vice President and Principal Analyst

Hurwitz & Associates

# The Business Impact of Hybrid Cloud

- Gathering more data for rapid decisions, business agility
- There's a need for fast, persistent storage
- Data is being stored closer to the customer
  - Examples: Financial, Retail, Oil/Gas refineries

- As more apps move to Edge and Cloud, enterprise data centers must:
  - Identify apps for cloud migration
  - Clean up database sprawl
  - Replicate data across the hybrid cloud
  - Connect cloud “front-end” apps with “back-end” transactional databases
  - Partner with CSPs to apply AI to improve navigation of metadata

# Edge Computing Is Accelerating

- Demand for real-time analysis
- Often in remote sites
  - Oil refineries, retail stores, factories
  - IoT appliances/devices, self-driving vehicles
  - Hyper-converged systems
- Edge systems incorporate fast SSDs
- Analytics first, data transfer later
- New network fabrics to reduce latency
  - Leveraging NVMe for faster data transfers

# Hybrid Clouds Tap Data Differently

- Non-traditional data sources proliferate (social media, IoT)
- Dealing with 160 ZB+ of data worldwide by 2025
- Integrating end/end services (Transactional + Mobile)
- Cloud Object Storage
- Data Optimization for efficient use on-prem *and* off-prem
- Still key: Ensuring HA/DR and security for enterprise data

# Building Out: What's Next

- Use NVMe for faster end-to-end data transfers from DC to cloud to edge
- Harmonize SQL databases with non-SQL ones in the enterprise mix
- Establish regional data “hubs”
- Replicate key data-sets across the cloud
- Go to hybrid cloud, leading to multi-cloud to leverage a range of cloud usage models

# Time for New Memories?

Tom Coughlin

Coughlin Associates

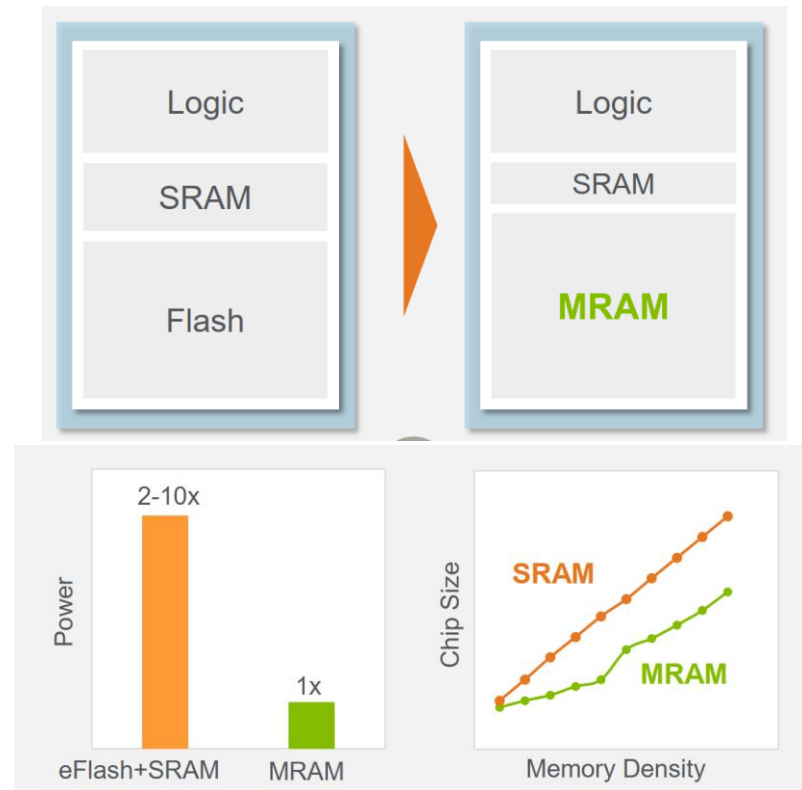

[www.tomcoughlin.com](http://www.tomcoughlin.com)

# MRAM In Embedded Devices

- MRAM is smaller than SRAM (with 5-6 transistors/cell)
- NOR Flash cannot shrink beyond about 22-28 nm
- MRAM could replace SRAM and NOR flash memories in embedded AI devices consuming less power with higher memory density

Images from Kevin Moraes, AMAT, 2019 Semicon

©2019 Coughlin Associates

# MRAM AI Developments

- All the major semiconductor foundries have said they will provide embedded MRAM in SoC products including Samsung, TSMC, Global Foundries UMC, etc.
- Many of these foundries are also looking to move MRAM integration away from BEOL to earlier in the chip production process to reduce cost
- New tools are needed for MRAM, driving capital equipment spending

# Lightspeeur<sup>®</sup> 2802M, *Production AI Accelerator Chip with MRAM (from 2019 CES)*

- Includes: The GME (Gyr Falcon MRAM Engine)
- 9.9 TOPS/W in a 22nm ASIC
- Produced via TSMC Collaboration
- Industry leading features, like Non-Volatile Memory

~ 40 MB of Memory	Large embedded models	
	Multiple AI models :	
	Image Classification	Facial recognition
	Voice identification	Voice Commands
	Text to speech	And others.....
Power Savings	20-50% when compared to SRAM or “other MRAM”	
Custom Designs	One Time Programmable Memory	
	up to 10 ns Read Speed (~30 TOPS/W)	
	Non-Power Leakage	

# Growth in MRAM Memory Shipments

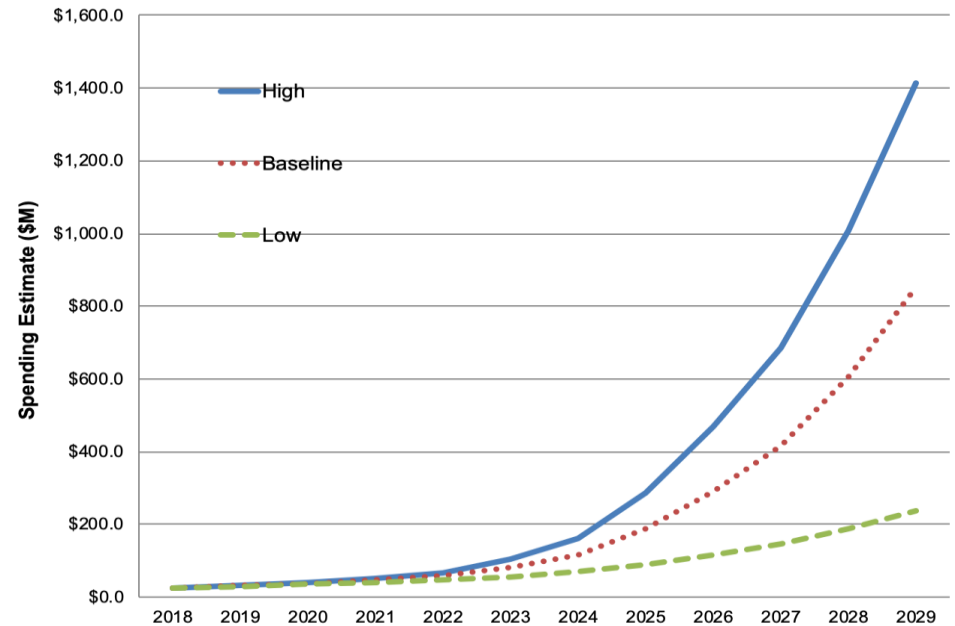

- MRAM will replace the bulk of embedded NOR and SRAM in SoCs, mostly for AI apps
- The chart shows projected baseline petabyte memory shipments from 2018-2029.

2019 Emerging Memories Ramp Up, Coughlin Associates and Objective Analysis, 2019

©2019 Coughlin Associates

# MRAM Capital Spending Up

The chart shows low, baseline and high MRAM manufacturing equipment spending estimates from 2018-2029.

2019 Emerging Memories Ramp Up, Coughlin Associates and Objective Analysis, 2019

# For Further Information

## Report on Emerging Memories and Workshop on Emerging Memories and AI

### EMERGING MEMORIES RAMP UP

*Available June, 2019*

This report, jointly produced by Objective Analysis and Coughlin Associates, provides an exhaustive look at emerging memory technologies and their interaction with standard memories, both as discrete devices and in embedded applications (the memories within logic chips like ASICs and MCUs). The report provides a well of technical information, market dynamics, forecasts, and competitive analyses of the leading companies. Forecasts show how the markets will grow not only for the technologies themselves, but also for the capital equipment used to produce them. Read this to understand the competitive landscape and market drivers for these new memories, and to learn how to profit from tomorrow's market.

#### Table of Contents (Top Level):

EXECUTIVE SUMMARY .....	17
INTRODUCTION: .....	19
WHY EMERGING MEMORIES ARE POPULAR.....	23
HOW A NEW MEMORY LAYER IMPROVES COMPUTER PERFORMANCE.....	31
UNDERSTANDING BIT SELECTORS .....	38
RESISTIVE RAM, RRAM, RRAM, MEMRISTOR: .....	46
FERROELECTRIC RAM, FERAM, FRAM:.....	53
PHASE CHANGE MEMORY (PCM):.....	58
INTEL/MICRON 3D CROSSPOINT MEMORY .....	62
MRAM (MAGNETIC RAM), STT MRAM (SPIN TRANSFER TORQUE MRAM).....	66
OTHER EMERGING MEMORY TYPES.....	79
LITHOGRAPHY:.....	84
3D MEMORY CIRCUIT DESIGN:.....	93
SUMMARY OF SOLID-STATE MEMORY & STORAGE TECHNOLOGIES.....	94
MRAM AND STT MRAM PROCESS EQUIPMENT .....	99
PHASE CHANGE MANUFACTURING EQUIPMENT .....	126
MEMORY IS DRIVING SEMICONDUCTOR CAPITAL SPENDING .....	127
MARKET PROJECTIONS FOR MRAM, AND 3D XPOINT MEMORY .....	128
ESTIMATES OF MRAM CAPITAL EQUIPMENT DEMAND .....	146
COMPANY INFORMATION: .....	157

**EMAI 2019**  
**Emerging Memory and Artificial Intelligence**  
**Workshop**  
Bechtel Conference Center at Encina Hall  
Stanford University  
August 29, 2019

This is a one-day workshop featuring invited experts speaking on emerging memory technology, such as MRAM, RRAM, FRAM and PCM as well as experts on applications using various types of AI, such as machine learning, talking about memory requirements for these applications. The morning will feature speakers on the foundational knowledge of emerging memory technologies and AI, with the afternoon featuring speakers on applications for AI including these applications using emerging memory technologies.

# Presentation at Flash Memory Summit Panel MRES-201A

Chris DePuy  
chris@650group.com  
+1 650-600-7105

# Storage Systems: Customer Type – Total (I+E)

# Storage Systems: Equipment Type – Total (I+E)

# Storage Systems: Vendor Landscape – Total (I+E)

We started 650 Group to provide our subscribers and customers with a unique perspective on the industries we research. Our team has decades of experience researching our focus industries and in roles at companies similar to the ones we cover. We research the data center, communications and Information Technology markets.

- Founded in 2017 by Chris DePuy and Alan Weckel
- Headquartered in Silicon Valley
- Trusted source of research for system vendors, component manufacturers, service providers, sell-side, buy-side, and standards bodies
