

Saving the Past Unlocking the Future

Steffen Hellmold, President Cerabyte, Inc.

Long-Term Data Storage at Scale Becoming Unsustainable?

Migration & maintenance is infrastructure and resource intensive

Media life and
data retention

Migration

Fixity checks

Bandwidth

Access

“ Migration is infrastructure, not a one-time task. Archival systems must inherently support long-term durability. ”

Carl Watts

“ Users resort to compression to reduce the number of objects and storage space, conflicting with preservation standards. ”

Dan Field

Data Lifecycle Requirements for the AI Era

Price Lowest \$/TB, Lowest TCO

Performance

Access time
Read speed
Random access
Write speed

Capacity

Seamless scaling
Rack scale design
Sustainable roadmap
Volumetric density

Reliability

BER 10^{-19}
No bit rot
Resilient to: Temp,
Humidity, EMP, Radiation

Security

Air gap
Immutable
WORM
Physical media

Sustainability Power & Water consumed, CO₂ & electronic waste generated

Source: Horison, LLC

Data Service Level Agreement – AI requires data to be accessible!

Paradigm-shift

Cold Archive

Active Archive

Wanted: A New Storage Tech for the AI Era

Optimizing capacity storage for affordability and accessibility

A New Storage Media – Keeping It Simple!

Inorganic recyclable media at the cost of sand featuring longevity & scalability

Silica sand

Flexible ultra-thin
display glass

Window glass
coating

Massive Parallelization

Millions of “heads” enabling high performance W/R

Write

Read

Surface layer yielding high SNR – enabling simple fast optical readout

How to Pass on the Digital Heritage to Coming Generations?

Open Archive Media Framework (Identify/Read/Decode)

*= Standard(s) for emerging
long-term data storage*

Forward propagation of individual & societal information

Cerabyte Data Storage Technology

Fit for future AI data lifecycle requirements

Scalable roadmap towards the Yottabyte Era

Fast W/R serving future AI/ML access needs

Sustainable, permanent & maintenance-free

Affordable accessible capacity data storage

International long-term data storage standard
