

Can file systems survive in data-centric world?

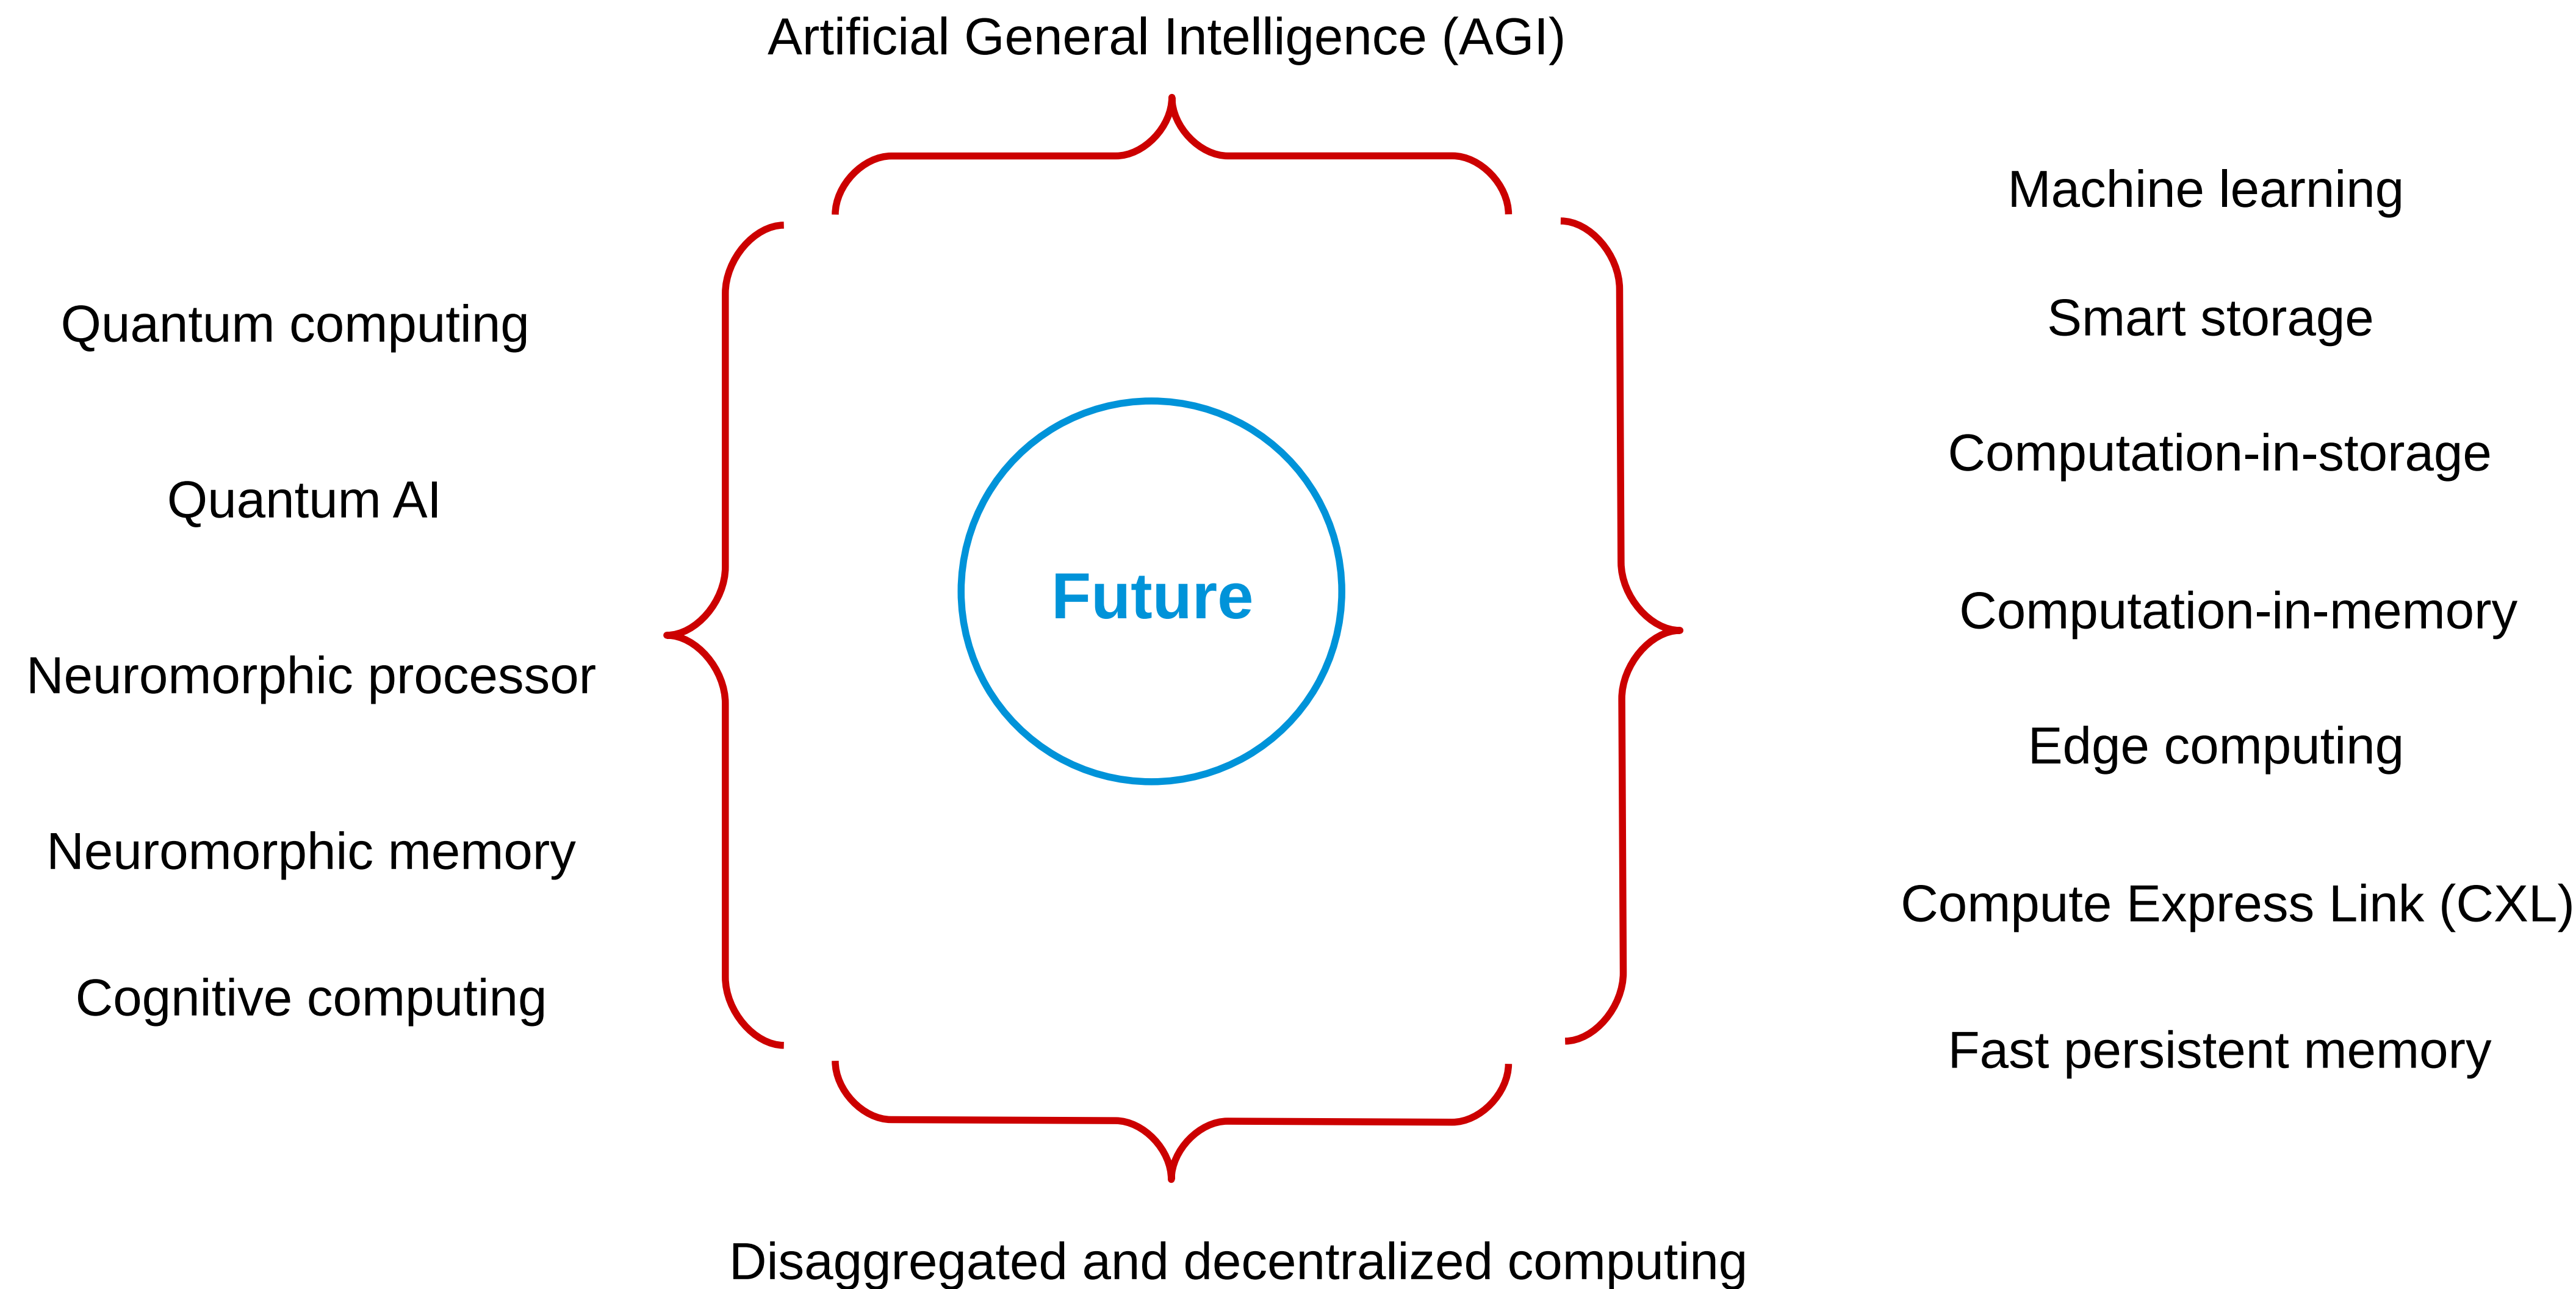

Viacheslav Dubeyko
PhD, Linux kernel developer
IBM

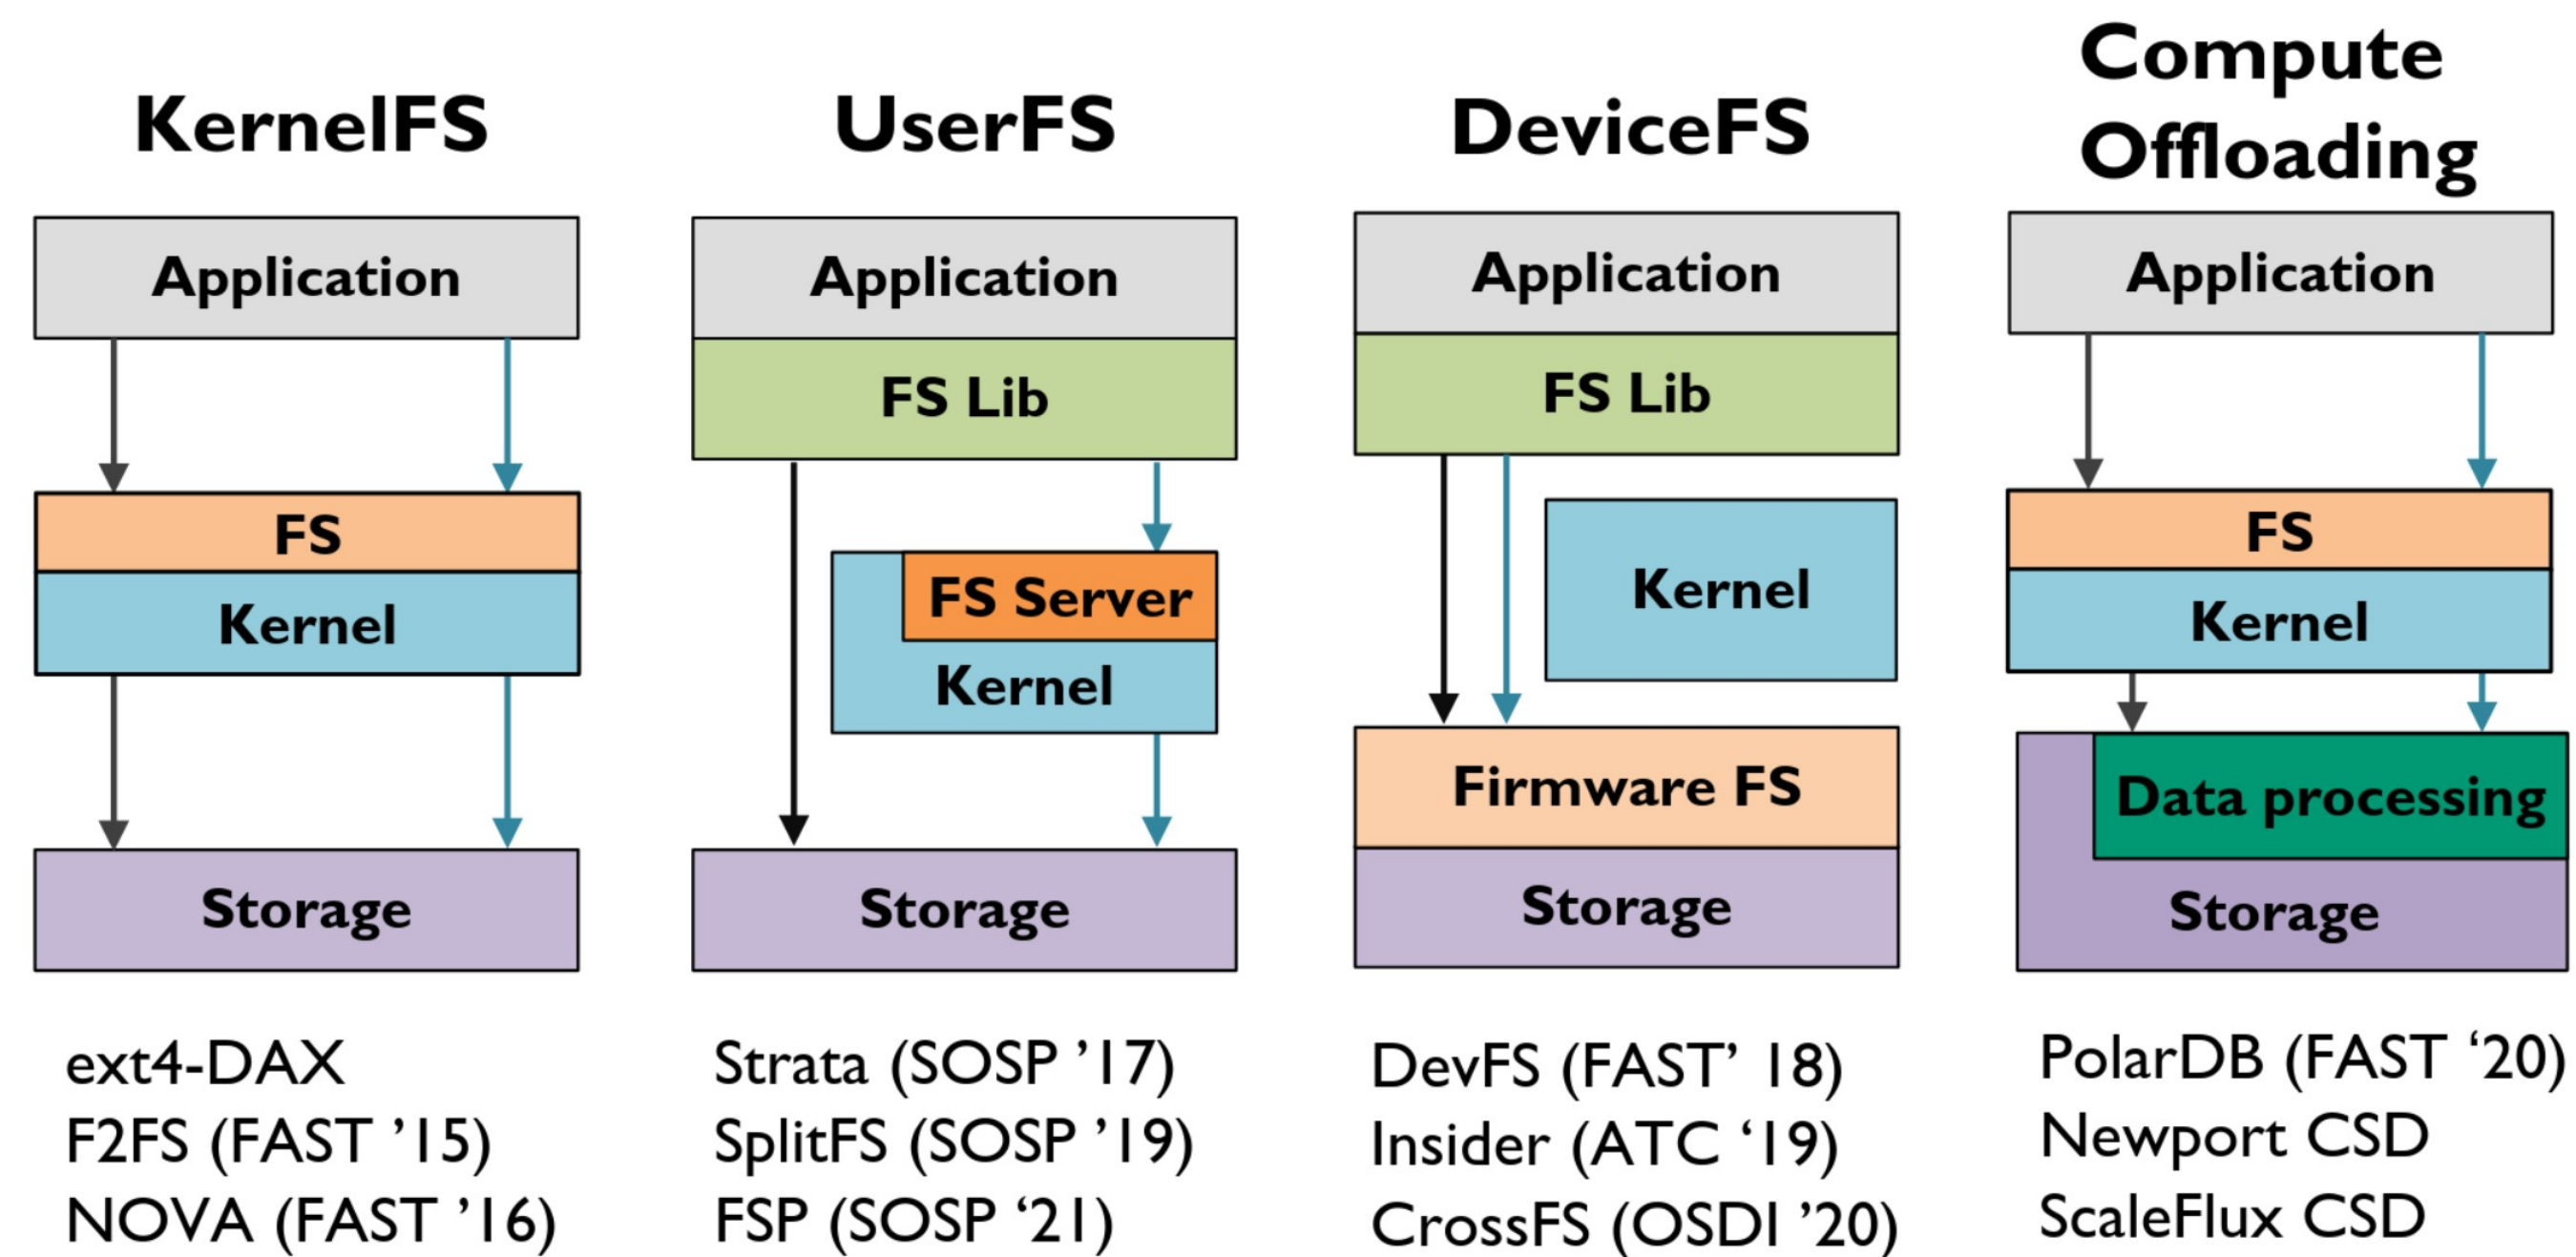

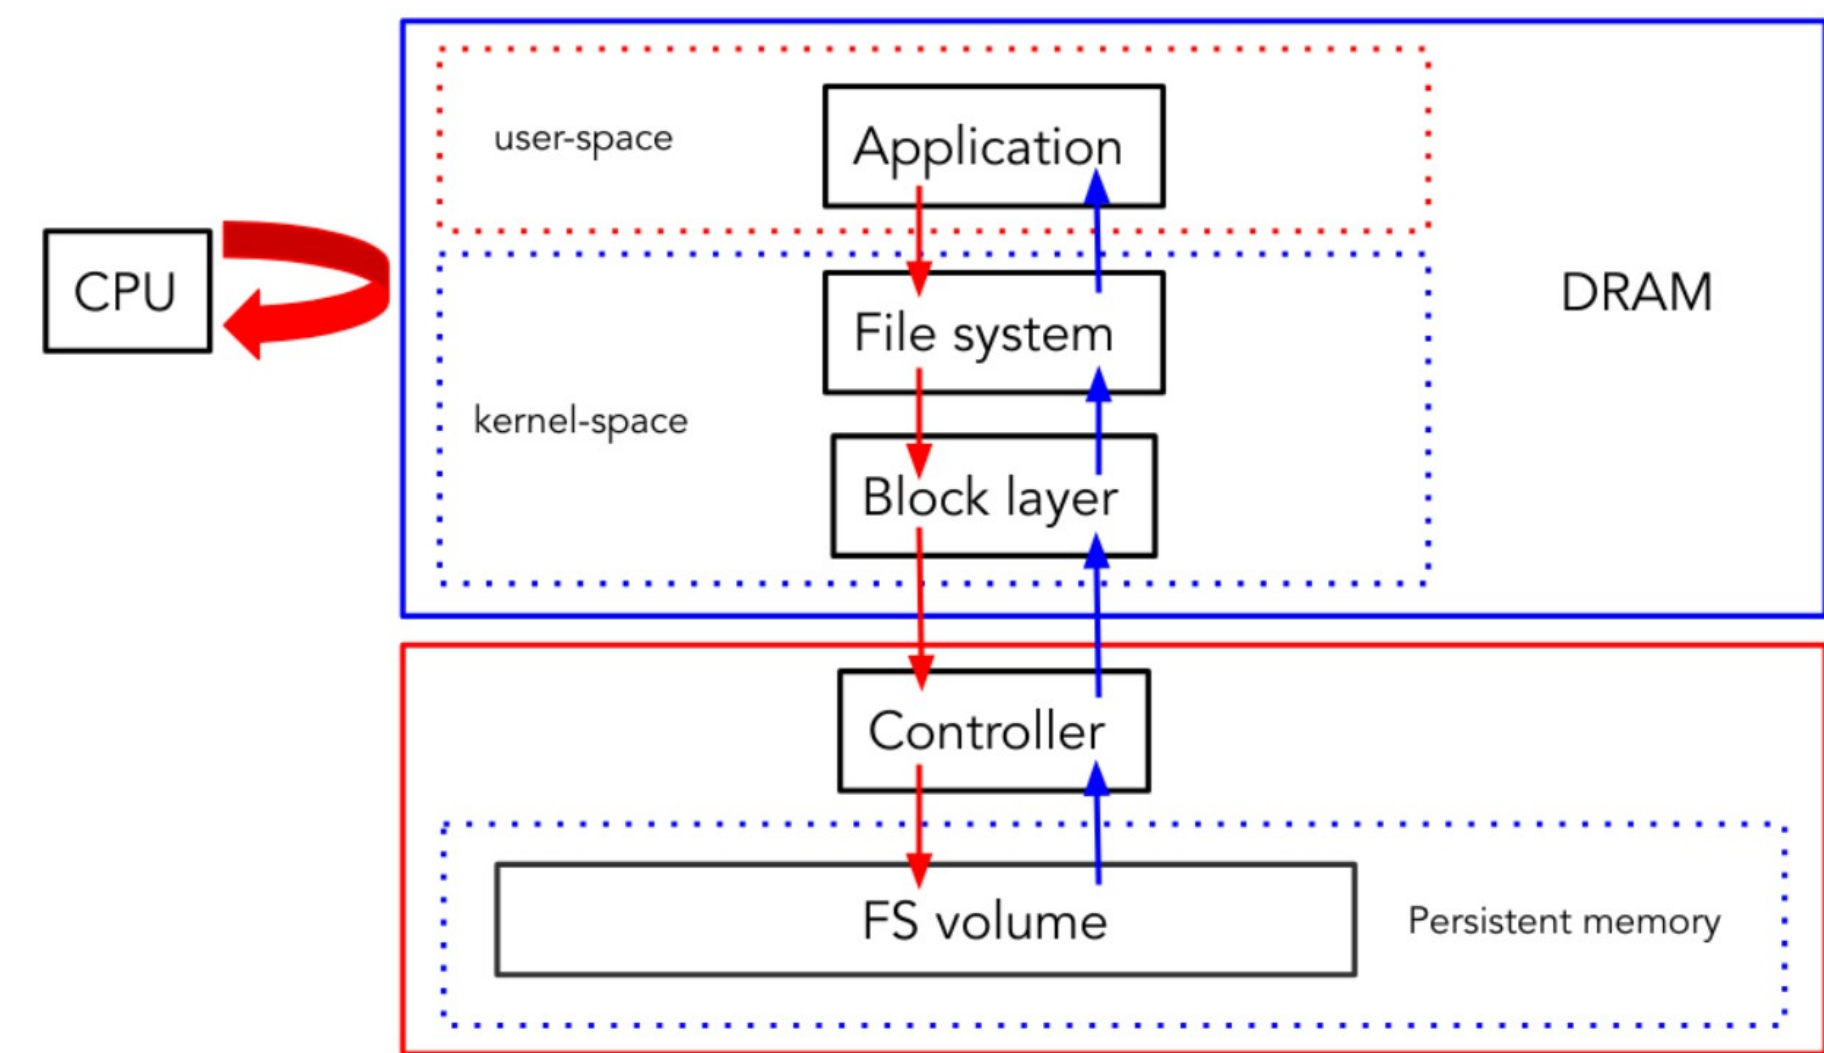

What's the point of file system?

Future technologies and technological trends

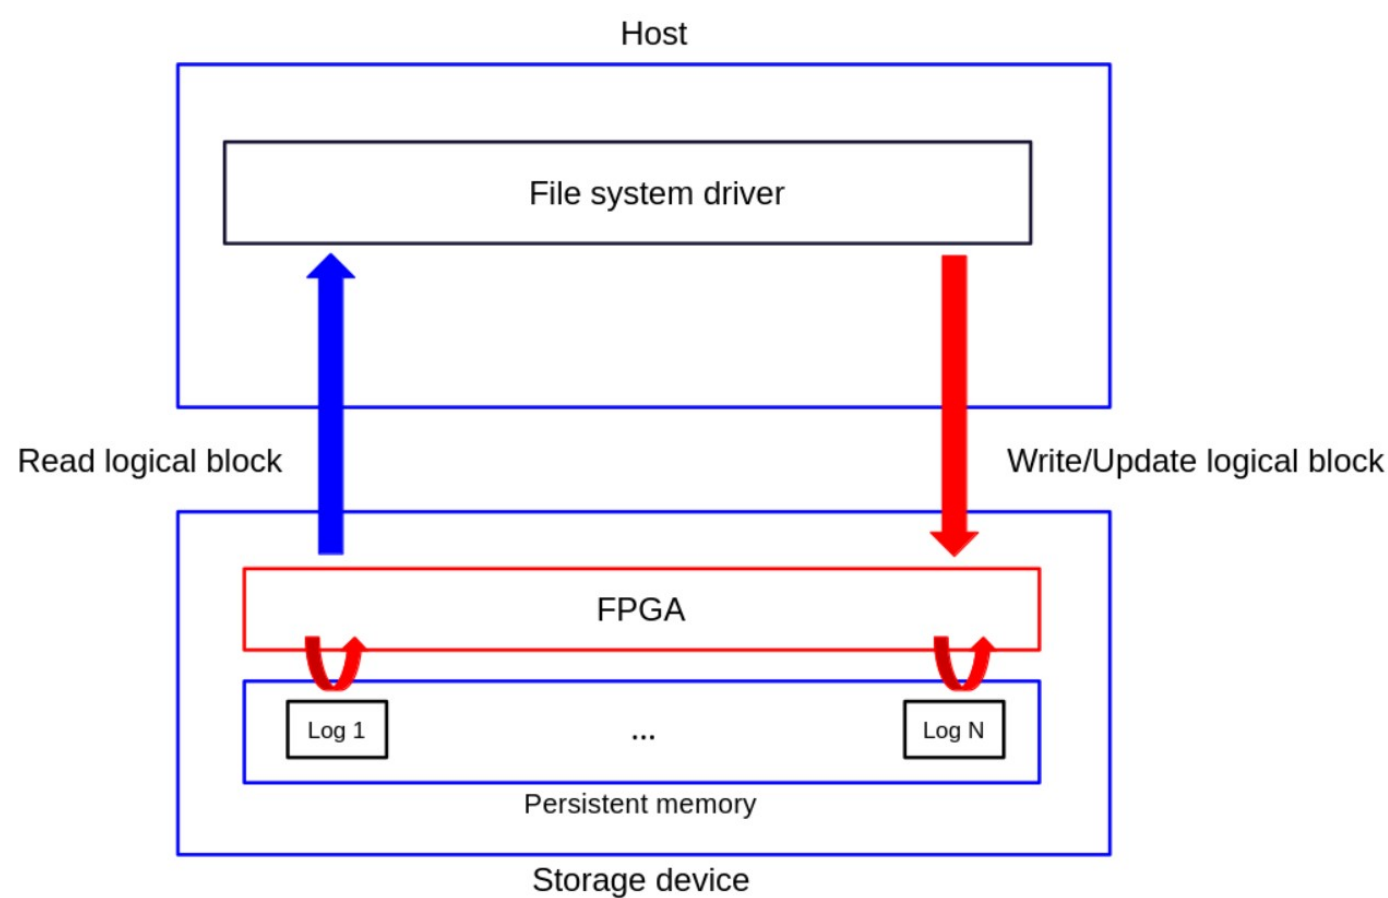

Why file systems introduce overhead?

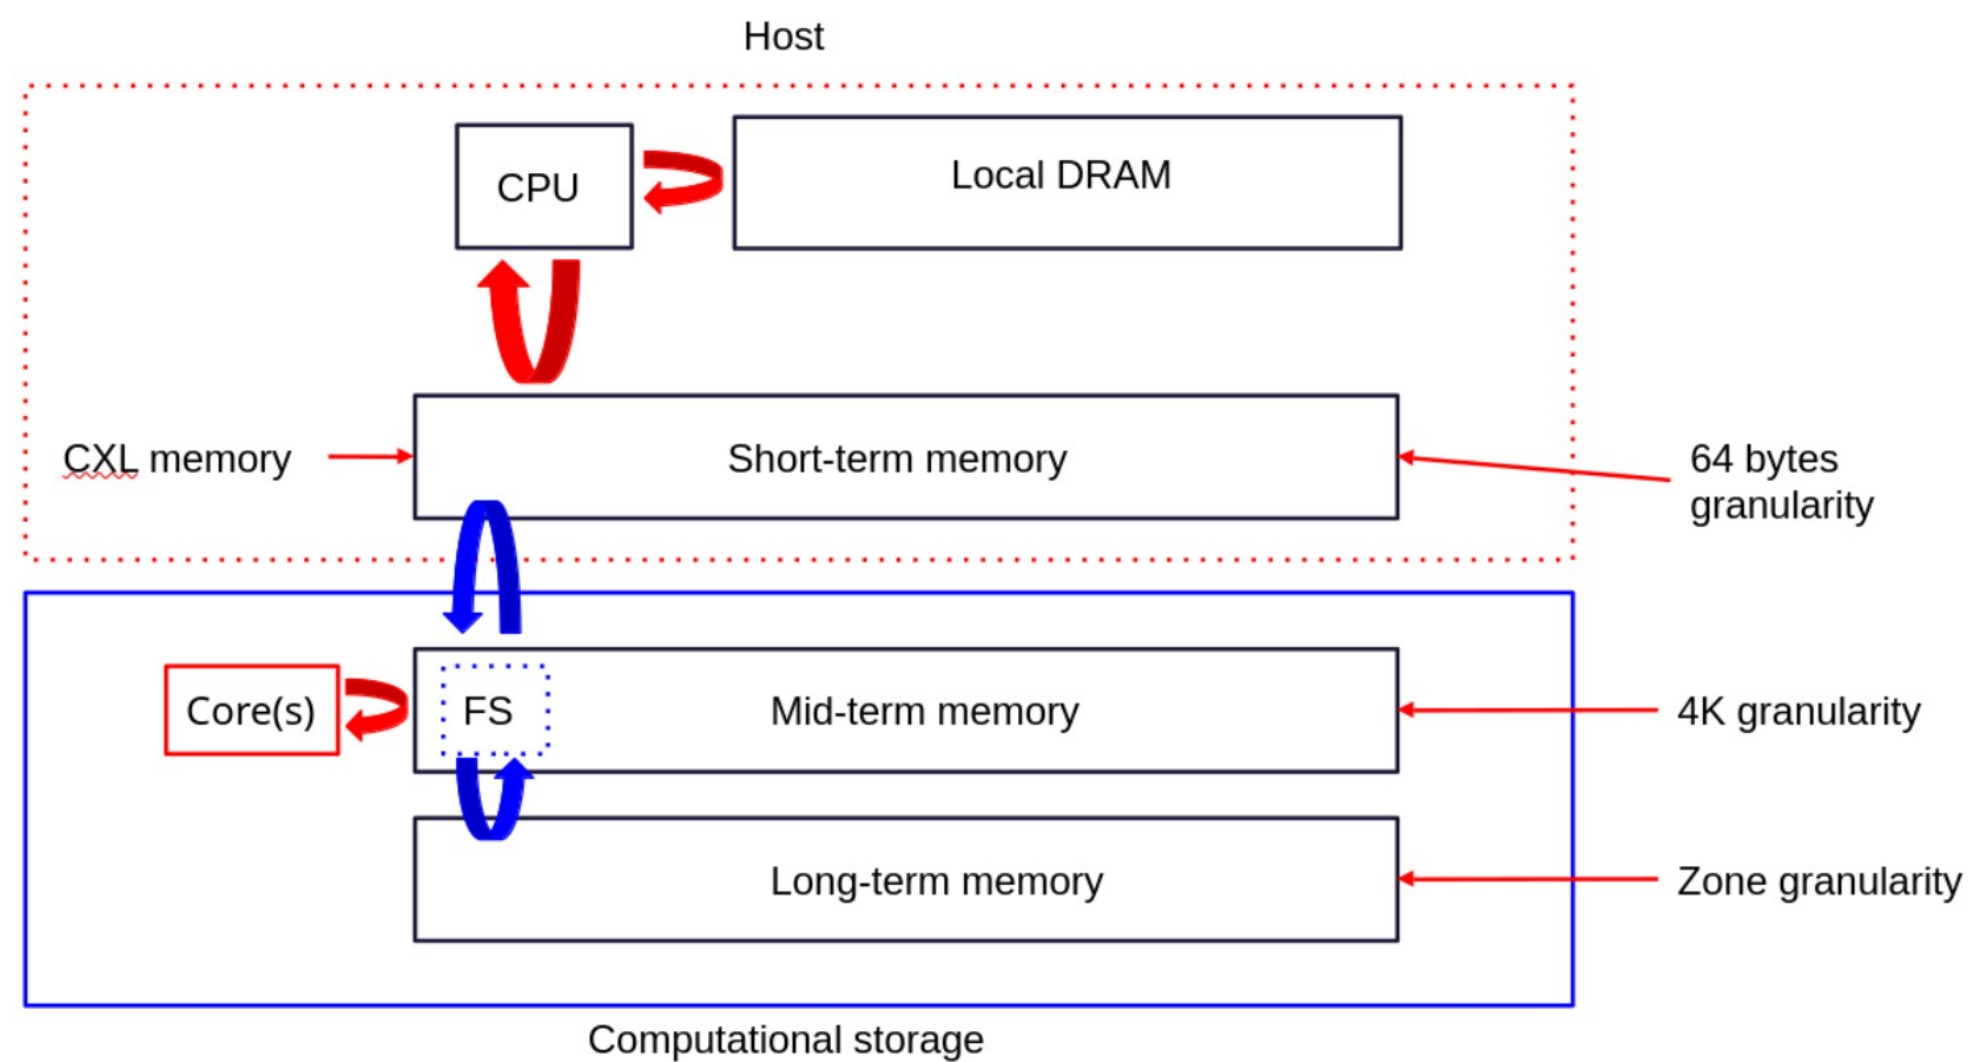

Jian Zhang, Yujie Ren, and Sudarsun Kannan, “FusionFS: Fusing I/O Operations using CISCops in Firmware File Systems”, 20th USENIX Conference on File and Storage Technologies (FAST 22)
https://www.usenix.org/system/files/fast22_slides_zhang-jian.pdf

Will we need file systems in the future?

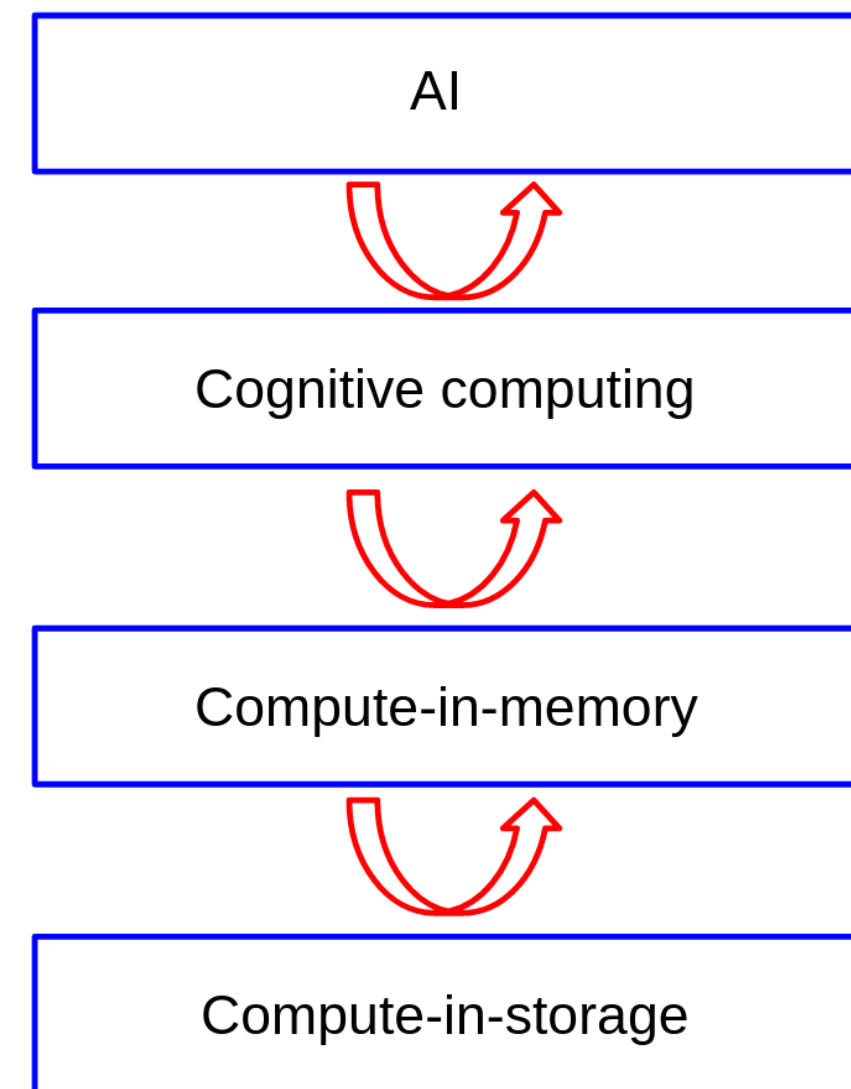

YES

Maybe

NO

Can file system technologies satisfy the future technologies' needs?

Quantum computing

Neuromorphic computing

Machine learning

Artificial General Intelligence

Cognitive computing

Disaggregated + edge computing

NO!

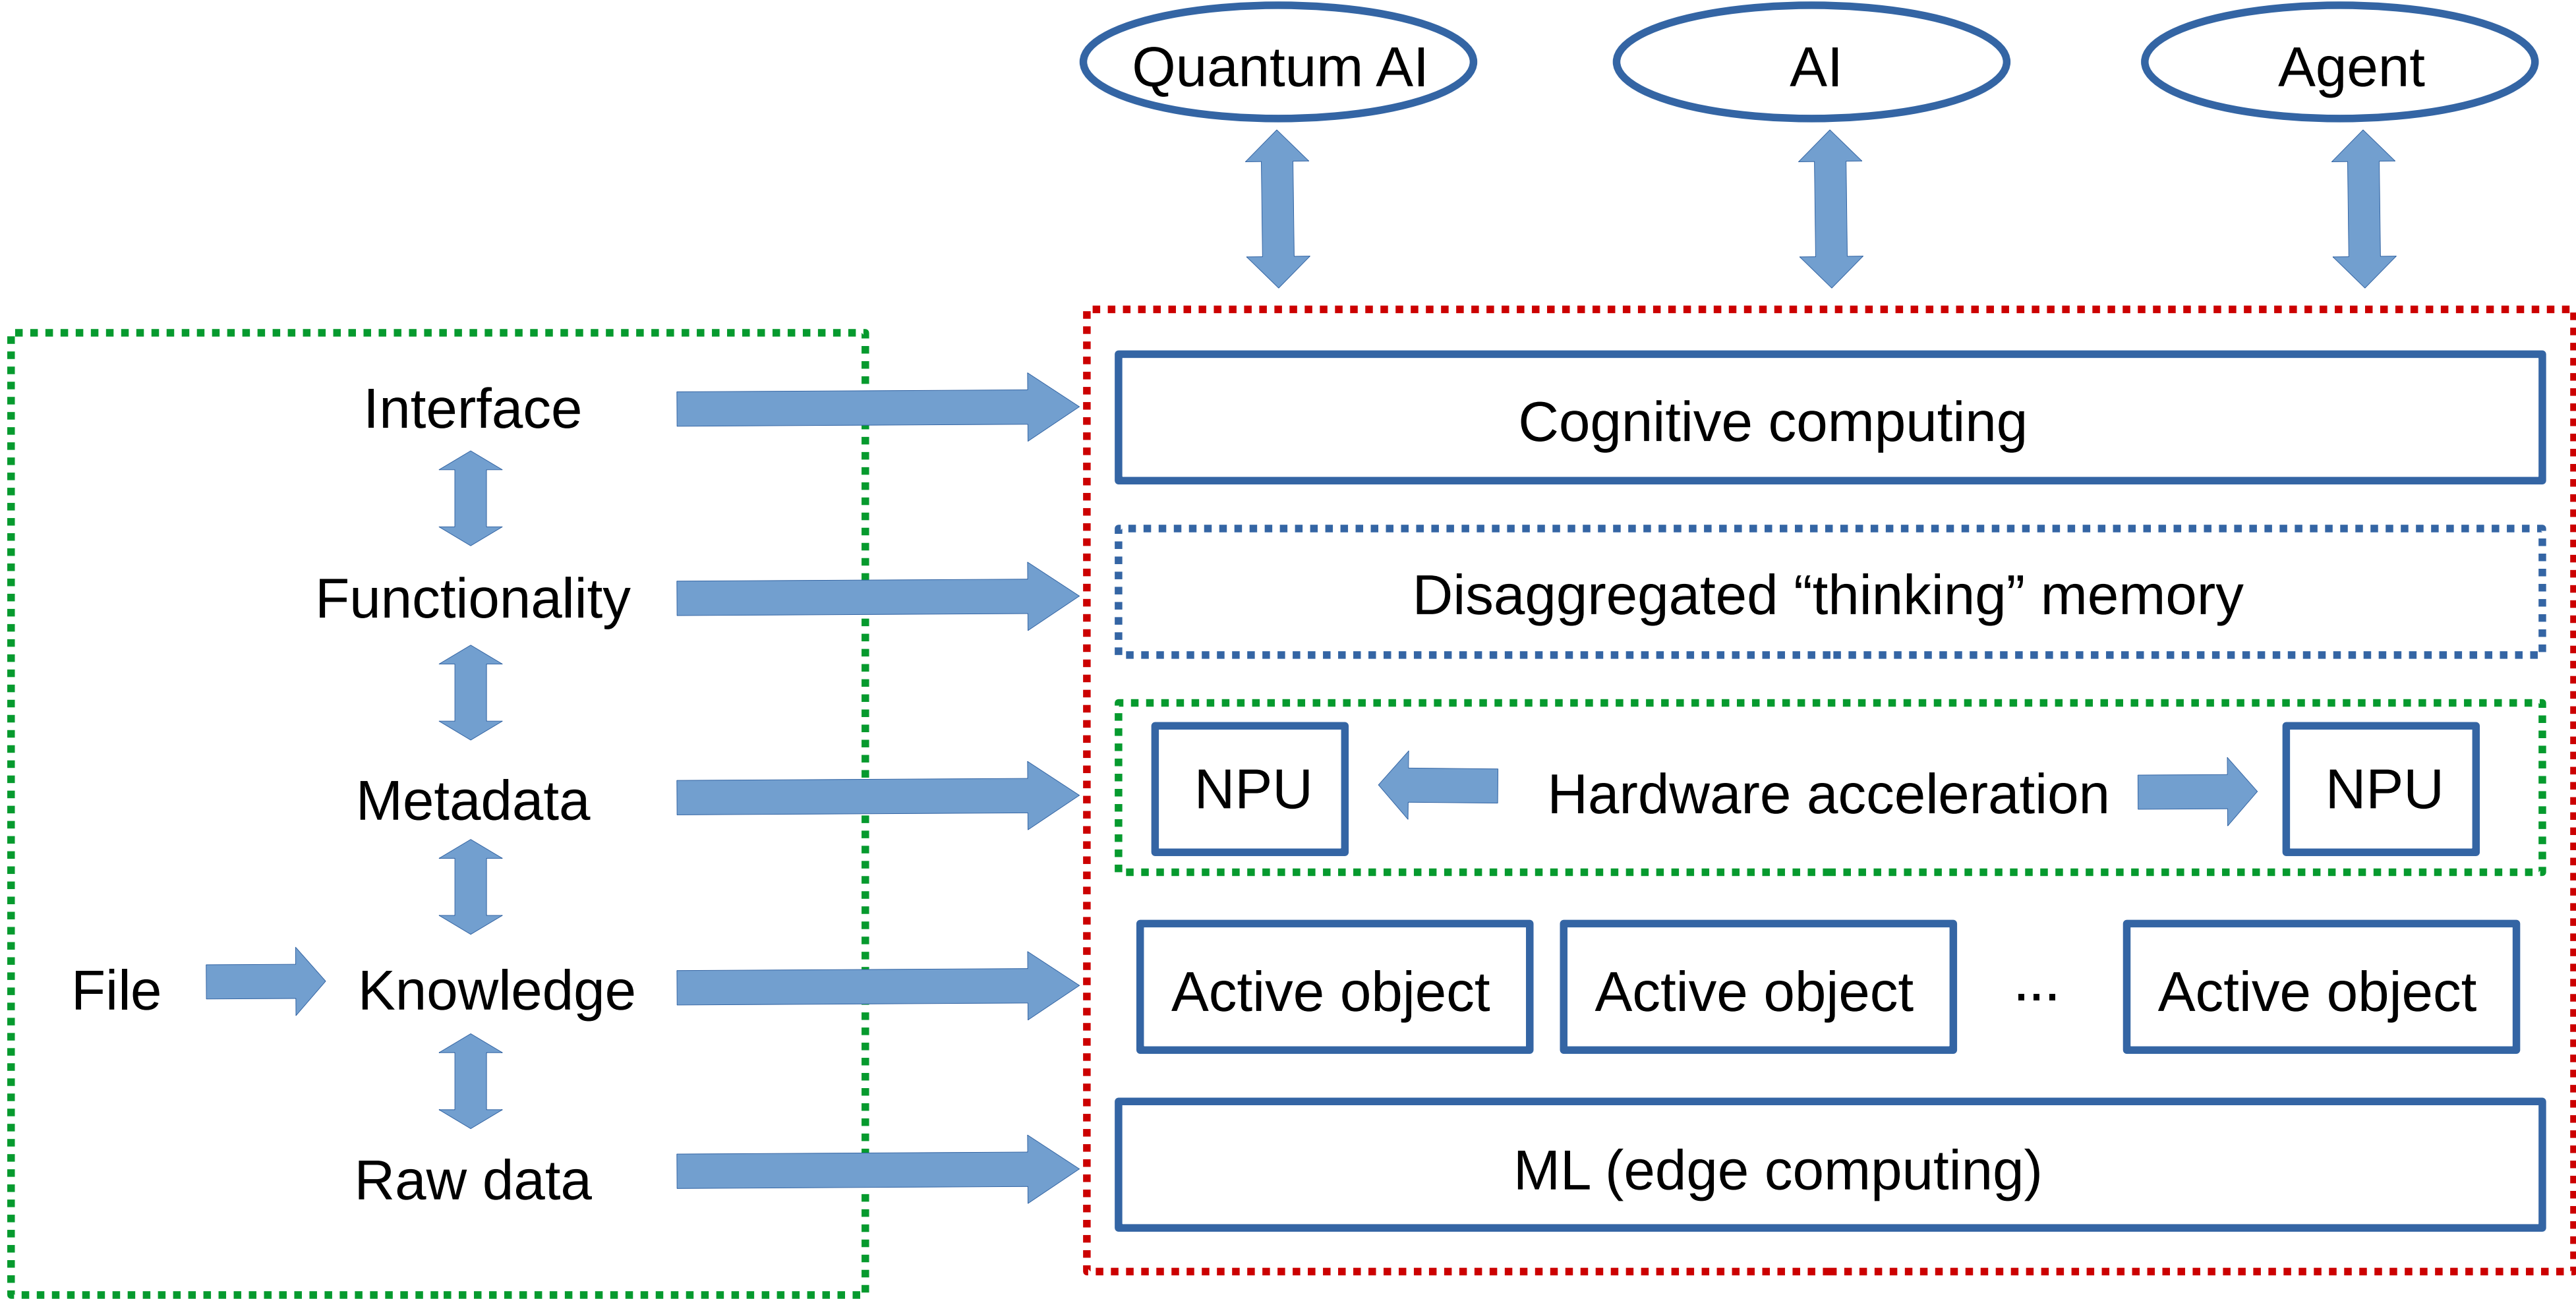

Why?

File system:

- storage device
- OS subsystem
- file
- process
- namespace
- permissions
- POSIX
- programming model

Future of file systems

Questions?
